SUMMARY

Computer Science student with 2 years of experience in backend development and exposure to financial systems. Strong problem solver with good leadership skill. I can easily fit in a team; I love challenges and I'm not afraid to try new things. Currently seeking for a junior position to advance backend and AI development.

SKILL

Languages: C#, Java, Python, JavaScript, PHP, SQL (T-SQL)

Frameworks/Libraries: ASP.NET, Jakarta EE (Servlets), Flask, Tailwind CSS

Data/AI: pandas, NumPy, scikit-learn, SBERT, semantic search (cosine similarity), basic NLP

Databases: SQL Server (SSMS, T-SQL, indexing), MySQL/PhpMyAdmin, SQLite (incl. better-sqlite3), H2

Infra & Hosting: Azure VM (IaaS), IIS, Tomcat

Tooling: Git/GitHub, Visual Studio 2022, VS Code, Terminal

EDUCATION

Diploma of College Studies DEC – Computer Science	Jan 2024 – Present
LaSalle College, Montreal, QC	First in class (A+)

EXPERIENCE

Back-end Developer (ASP.NET)	Jan 2025 – Present
Machine Builder Inc.	Montreal

[LchanceCapital.com](https://lchancecapital.com) – Financial Platform for Limited Partnership Fund

- Built secure ASP.NET features handling thousands of financial transactions using C# and SQL Server.
- Designed and implemented P&L, tax, fee, and rate-of-return algorithms.
- Collaborated with an accountant to validate financial formulas for accuracy and consistency.
- Resolved production issues across backend, database, and cloud layers using logs, SQL profiling, IIS diagnostics, and PowerShell.
- Implemented encryption across the website and database, improving system security and earning stakeholder trust.
- Provided off-hours production support and participated in on-call rotations as the first responder.
- Set up Azure VM (99.9% uptime), configured IIS hosting, and integrated domains with Azure and GoDaddy.
- Solved critical backend issues under tight deadlines, demonstrating strong problem-solving skills and composure under pressure.

Machine Builder Inc.

- Shadowed senior developers to learn C#, ASP.NET, SQL Server, and the fund's internal trading systems.
- Learned trading concepts used by the fund, including positions in stocks, options, and forex.
- Managed SQL Server tasks: daily health checks, automated backups, and rebalancing using stored procedures.
- Developed automated log-reading processes to support system monitoring and reliability.
- Investigated production issues through SQL profiling, log analysis, and debugging support.
- Gained a strong understanding of how backend financial algorithms interact with fund data, reporting tables, and P&L calculations.

PROJECTS

AI-Based Note-Taking System

Nov 2024

Python | Flask | NLP (Natural Language Process)

- Built an app using Flask, with Python libraries to categorize and summarize notes for easier finding.

AI Facial Authentication for Login

Feb 2025

JavaScript | PHP | PhpMyAdmin | HTML | CSS | Git

- Built a web facial-recognition login with JS face detection, PHP, and PhpMyAdmin, improving security and speed.
- Live demo was built using Python, Flask and SQLite to simplify hosting, and make testing/development easier.

Forex Realtime Alert System

May 2025

C# | Python | IBKR API | Twilio | SQL

- Built a FX/stock real-time alert system using Python, C#, Twilio SMS, and SQL, to speed up trading decisions.

Mini Applicant Tracking System (ATS) – Resume Parser

June 2025

Python | Flask | SQLite | JavaScript | HTML | CSS

- Built a web app that takes PDF/Word resumes and parses using Python, Flask, and store in SQLite. Speeding up profile creation and improve parsing accuracy.

LANGUAGES

English: Fluent.

French: Limited working proficiency (in progress).
