SUMMARY

Backend developer with 3 years of experience building and supporting production systems using C#, ASP.NET, SQL Server, and Azure. Experienced in financial systems, REST APIs, database logic, troubleshooting, and backend development with .NET and Node.js.

EXPERIENCE

IT Technician Intern

July 2026 – present

DART Aerospace

Montreal

- Supported enterprise IT operations across 6 global facilities, troubleshooting issues, analyzing root causes, and resolving incidents.
- Managed user access, software deployments, and Microsoft 365 administration, applying security and access-control practices across enterprise systems.
- Documented and managed technical incidents through Freshservice while collaborating with IT teams to diagnose root causes and restore services.

Software Developer Intern (Node.js)

May 2026 – July 2026

Activists of Tomorrow

Montreal

- Architected the backend and database foundation for a mobile app, using Node.js, Express, Supabase, PostgreSQL, and PostGIS.
- Designed REST APIs for authentication, map events, profiles, organizations, posts, and messaging.
- Secured backend endpoints with JWT authentication, ownership validation, role-based authorization, and rate limiting.

Backend Developer (ASP.NET)

June 2023 – July 2026

Machine Builder Inc.

Montreal

Project: Investment Club Platform – LachanceCapital.com

- Progressed from Developer Apprentice to Backend Developer, working primarily with C#, ASP.NET, SQL Server, Azure, and IIS.
- Built and maintained ASP.NET/C# backend services and REST APIs supporting thousands of financial transactions.
- Designed and maintained SQL Server logic for P&L, tax provisions, fees, year-end closes, rebalancing, and rate-of-return calculations.
- Collaborated with an accountant to validate financial formulas and ensure accurate financial reporting.
- Diagnosed and resolved production issues across backend, database, and cloud infrastructure using logs, SQL profiling, IIS diagnostics, and PowerShell.
- Managed database health checks, automated backups, monitoring, encryption, and off-hours production support to improve system reliability and security.
- Configured Azure VM infrastructure, IIS hosting, and production domain/DNS integration.

PROJECTS

FinCore – Personal Finance Platform

Aug 2026 - Present

C# | .NET | ASP.NET Core | EF Core | SQL Server

- Built FinCore to track income, spending, balances, and overall financial activity in one place.
- Used C#/.NET, EF Core, SQL Server, and layered architecture to manage financial accounts and transactions reliably.

Forex Alert System

Sept 2025

C# | .NET | Interactive Brokers API | Twilio

- Built a .NET market-data monitor using Interactive Brokers APIs and Twilio notifications.
- Implemented automatic reconnection for dropped market data connections and cooldown logic to prevent duplicate alerts.

PomodoroYT – Chrome Pomodoro Extension

Mar 2026

TypeScript | Chrome Extension | JavaScript | HTML | CSS

- Built a Pomodoro Chrome extension that controls YouTube, mutes ads, and syncs playback with focus sessions.
- Added configurable timers, themes, tasks, notifications, and saved settings using TypeScript and Chrome APIs.

SKILLS

Languages: C#, SQL, Python, JavaScript, TypeScript

Backend: .NET, ASP.NET Core, REST APIs, Node.js, Express.js, Flask

Databases: SQL Server, PostgreSQL, PostGIS, SQLite, MongoDB

Cloud & Infrastructure: Azure VM, IIS, PowerShell, Linux

Tools: Git, GitHub, GitHub Actions, Visual Studio, VS Code

Spoken Languages: English, French, Vietnamese

EDUCATION

Diploma of College Studies (DEC) – Computer Science
LaSalle College, Montreal, QC

Jan 2024 – 2026
